

We plan to make the Nordics an international hub for excellence and fast-growing innovation companies within mhealth. And we need you to make it happen!

Our mission is to identify the top 20 fastest growing companies of tomorrow - the ones that solve global challenges, create jobs and make this world a really great place to live.

If you and your business idea show that kind of potential, we will do just about anything to support you. We support the best of the best, with professional business advice, Power Hours, legal advice, HR/Team expertise, back office services, customer interaction, rapid prototyping, mentors, internationalization, marketing and more. All this in cooperation with industry representatives from Ericsson, Sony Mobile, Huawei, Blackberry, TeliaSonera, Lund University ...

Welcome to a workshop on how to support the creation of great Nordic m-health solutions and businesses!

On September 18th, we will present the Mobile Heights Business Center's *M-health project design and offer to startups and partners*. We want to discuss this with you and others who might be interested in working towards making the Nordics a leading region in m-health. Startups, small and large companies, entrepreneurs, innovators, researchers, doctors, customers, industries, health care providers, associations ...

To get going, meet with us September 18th 1pm-4pm at Mobile Heights Center, Mobilvägen 10 in Lund, Sweden

To register or if you have any questions, please email Marianne.larsson@mhbc.se or Petronella.warg@mhbc.se

Or let us know that you're curious and you may get onboard next time. We will have monthly events with specifically designed activities to support the entrepreneurs' current challenges. For events and news, follow us on Twitter @mhbcbySweden, Facebook and LinkedIn.

Mobile Heights Business Center is a virtual business accelerator for startups, a shortcut to the market. We only work with driven innovators and entrepreneurs whose ideas have real growth potential. Our support to you is free of cost and can be added on top of the support you already get from your incubator, university innovation office, business angel or mentor. MHBC was initiated by Teknopol AB in a pilot project 2009 and is now funded by the telecom industry cluster in Mobile Heights and the regional council of Skåne. Our main office is in Lund, Sweden. See mhbc.se, teknopol.se, mobileheights.se for more information.
